EDUCATION

Indian Institute of Technology (IIT) Mandi **Aug 2024 – May 2026**
M.Tech in Computer Science and Engineering CGPA: 8.37 / 10
Babu Banarasi Das Institute of Technology and Management **Aug 2020 – Jun 2024**
B.Tech in Computer Science and Engineering CGPA: 8.27 / 10

EXPERIENCE

KPI Partners **Jul 2026 – Present**
Data Engineer I Bengaluru, Karnataka
- Completed hands-on training in **SQL, PySpark, Databricks, Azure Data Factory, dbt,** and **ETL testing** through structured learning paths and practical exercises.
- Developed independent data engineering projects using **PySpark, Spark SQL,** and **Databricks**, processing 2.96M NYC Taxi records and building retail analytics dashboards for the **MegaMart capstone** and **NYC Taxi analytics project**.
- Practiced data transformation, data quality validation, and distributed processing workflows.

Amazon **Jul 2025 – Dec 2025**
SDE Intern Bengaluru, Karnataka
- Enhanced **Java backend microservices** and data pipelines to standardize catalog attributes across distributed systems, improving product-matching coverage by **15–20%**.
- Extended **DynamoDB schemas** and ingestion workflows to support pricing-validation attributes, adding data mappings, error handling, and unit tests to improve data reliability across APIs.
- Strengthened system reliability through dynamic configuration with **AWS AppConfig**, automated mapper notifications, and **LogScan/PMet-based monitoring** for proactive failure detection.

PROJECTS

SplitSmart: Full-Stack Expense Sharing Application **Oct 2026**
React.js, Vite, Supabase, PostgreSQL, SQL, JavaScript
- Developed a full-stack expense-sharing application supporting multiple groups, expense tracking, and equal, exact, and percentage-based splits with **paise-level precision**.
- Implemented **Supabase Authentication, PostgreSQL, and Row-Level Security (RLS)** to manage user profiles, group memberships, and private personal expenses.
- Built group balance calculation, debt simplification, partial settlements, recurring bills, and invitation workflows, with secure database operations and a responsive React UI.

StreamPulse: Real-Time Distributed Log Analytics and Monitoring Platform **Aug 2026 – Sep 2026**
Python, Apache Kafka, Spark Structured Streaming, DataStax Astra DB, FastAPI, React.js, Docker
- Engineered a real-time log ingestion pipeline using **Apache Kafka (3 partitions)** and **Spark Structured Streaming** to process events from distributed services.
- Implemented streaming aggregations for error rates, warnings, response times, and service health, persisting operational metrics in **DataStax Astra DB**.
- Connected a **FastAPI** backend to a **React** monitoring dashboard through REST endpoints and WebSockets; containerized services with Docker Compose and deployed on **AWS EC2**.

HindiPoetLM **Dec 2024 – Feb 2025**
Python, NLP, Transformers (BERT, XLM-R), Machine Learning
- Developed a Hindi NLP classification system using a curated dataset of **1,000+ poems** spanning Doha, Ghazal, and Nazm.
- Evaluated SVM, Random Forest, and transformer-based models including mBERT and XLM-R, achieving **95.17% accuracy** in the reported classification task.
- Applied transfer learning and feature engineering to improve model generalization and address overfitting.

SKILLS

AI/ML & Data: Machine Learning, Deep Learning, NLP, Transformers (BERT, XLM-R), LLMs
Programming & Core CS: C++, Python, Data Structures & Algorithms, OOPs, DBMS, Operating Systems
Backend, Cloud & Tools: Node.js, Flask, SQL, DynamoDB, MongoDB, AWS, Docker, Kubernetes, CI/CD, Git, Linux

ACHIEVEMENTS

- Solved **500+ DSA problems** on LeetCode and GeeksforGeeks.
- Completed **100-day coding streaks** on LeetCode and GeeksforGeeks.
- Earned a **4-star rating in C++** on HackerRank.
